The Vance Report Is Indicative Of
Our "Model" Is Water System. Naturally,
They Are Reviewing Their Products, But, With
Some Effort, We Should Be Able To
Keep Things Under Control Once Again.

I Feel We Need Some Form Of
Coordination Of The Entire Program,
Which Is Something We Have Until About
4-5 Years Ago. I Have Some Ideas
On This And Would Like To Discuss
With You A Little Later This Week.

In The Morning, I Can Tell You
Possibilities For Secure And Vague Products,
That We Are Trying To Get Back In Shape
I Consider The Situation Of Our "Goals"
System "Quite Important, Both From A
Water Cost Standpoint, As Well As To
Constitute Treatment Criterias.

I Would Like Bill Grant To Have A
Copy Of This And Future Reports,

File 1104

November 3, 1970

Cerro Copper and Brass Co.
East St. Louis, Illinois

Attention: Mr. A. Suhre
Maintenance Supt.

Subject: Water Treatment Program Report

Gentlemen:

The enclosed report is presented with the following points in mind.

1. Briefly explain existing water treatment programs in various plant systems.
2. Point out areas of concern regarding inadequate application of chemicals.
3. Redefine proper application techniques and control limits.
4. Recommend changes in treatment programs and system operation that will update operation and result in better and more economical results.

The report is an accumulation of information gathered from discussions with Maintenance, Engineering and Laboratory personnel. Information was also obtained from on-the-spot testing, review of laboratory test records and observation of operation.

Very truly yours,

Don L. Manlove
District Representative

DLM/gg
